## Automated Cash Drawer

Imagine a cash drawer that is always in balance. It is now a reality with SYNC – an automated cash drawer that knows how much cash it has. It will tell the cashier real time if incorrect change is being given so cashier can correct their error.

- ➔ Automatic balancing – no need to count cash to balance each shift.
- ➔ Eliminate cash shrink: no discrepancies, no shortages.
- ➔ No need to empty the cash register during shift change.
- ➔ Better flexibility in resource planning: any associate can seamlessly assume cashier role at any register, even for a very short period.
- ➔ Improved customer shopping experience: quick response to customer lines and smooth transition between shifts.
- ➔ Greatly reduced daily till build time: only cash prep each till, not each shift.
- ➔ Save valuable time by eliminating investigations related to cash shrink.
