

Automated Cash Drawer

Imagine a cash drawer that is always in balance. It is now a reality with SYNC – an automated cash drawer that knows how much cash it has. It will tell the cashier real time if incorrect change is being given so cashier can correct their error.

- ➔ Automatic balancing – no need to count cash to balance each shift.
- ➔ Eliminate cash shrink: no discrepancies, no shortages.
- ➔ No need to empty the cash register during shift change.
- ➔ Better flexibility in resource planning: any associate can seamlessly assume cashier role at any register, even for a very short period.
- ➔ Improved customer shopping experience: quick response to customer lines and smooth transition between shifts.
- ➔ Greatly reduced daily till build time: only cash prep each till, not each shift.
- ➔ Save valuable time by eliminating investigations related to cash shrink.

Specifications

Technology	Advanced weight-based counting of bills & coins
Life Cycle	Tested to a minimum of 1 million transactions
Mounting	Bolt down facility in the base
Dimensions	17.36" x 16.61" x 4.72" (W x D x H)
Interfaces	RS232, USB and TCP/IP Communication ports
Power Requirements	12V - 40V DC at 6 Watts (Dynamic Automatic Voltage) Optional Power Over Ethernet (802.3at)

Live dashboard and reporting

Real time visibility of all till dollar amounts

Real time text/email alerts to manager on discrepancies
Traceability of discrepancies for each cashier
